

Video Surveillance Industry Analysis Service Launched: Radically Lower Price Structure Makes Competitive Research Affordable to All Businesses

Provides daily in-depth analysis of technology, trends and companies in video surveillance. Get updates on advances in IP cameras, video management systems and NVRs. Access expert strategic recommendations and analysis on the effects of the recession.

New York, NY ([PRWEB](#)) January 6, 2009 -- Today, IP Video Market Info launches the Industry Insider Analysis Service (<http://ipvideomarket.info>). Security professionals get access to an unprecedented level of in-depth analysis and news on video surveillance companies, technology and trends.

Manufacturers, Integrators, Distributors and Investors will all benefit from critical information that help them make better decisions and react more quickly to new developments. The service will include continuous updates on over 100 companies, weekly analysis of the top news, competitive analysis of products and 50 page monthly pdf reports.

Unlike traditional consultants or analysts that charge hundreds of dollars per hour or thousands per report, the IP Video Market online service starts as low as \$9 USD per month. Based on proprietary software that performs data mining and analysis on tens of thousands of documents, IP Video Market can automatically find and distribute critical information direct to you online. The service is managed by John Honovich, the Video Surveillance Industry's leading analyst and founder of IP Video Market Info.

"As a former integrator and manufacturer, I know how hard it can be to get good information and how vital such information is in developing company strategies. This service should provide you a crucial advantage in determining who to partner with, how to compete and where the market and economy is heading," states John. "As importantly, we are excited and committed to providing a radically lower price structure. This low price, enabled by our unique technology and expertise, enables anyone to get information that only the largest companies could ever previously afford."

IPVideoMarket.info monitors and analyzes leading segments such as: IP cameras, megapixel cameras, NVRs, DVRs, IP video surveillance software, intelligent video, video analytics, storage clusters, wireless, PSIM, and IT convergence.

The site also monitors in-depth coverage of over 100 video surveillance companies (<http://ipvideomarket.info/companies>) including some of the most well known:

- IP and CCTV camera companies such as Axis, Pelco, Bosch and Sony
- Video management system companies such as Milestone, Genetec, Verint, March Networks
- Video analytic companies such as AgentVi, Cernium, ioimage, ObjectVideo
- Video surveillance storage companies such as Intransa and Pivot3
