

Worldwide Trade and Shipping Data Company TradeFBIUSA Launches

Multi-national companies can now receive information on global trade and import data with the launch of TradeFBIUSA, which features a valuable database of timely, accurate information on cargoes traveling through ports around the world.

Ft. Lauderdale, FL ([PRWEB](#)) August 4, 2009 -- [TradeFBIUSA](#), a company that enables multi-national businesses to transform shipping data into actionable intelligence, announces its recent launch. With TradeFBIUSA, companies can control the power of [global trade data](#) to improve business processes, while receiving a competitive advantage with the most competitive price in the industry enabling them to increase their bottom line.

"Globalization and economic factors are continually restructuring supply chain scenarios, creating forceful shifts in sourcing rewards. TradeFBIUSA systems have streamlined global trade data for today's domestic buyer, giving businesses the resources, insight and clarity necessary to make difficult decisions and build a competitive advantage," says Robert Levy of TradeFBIUSA.

TradeFBIUSA offers a comprehensive, easy-to-use database of timely, accurate U.S. import information on cargoes traveling through ports around the world. This data is collected from more than 40,000 bills of lading each day, allowing a company to find new suppliers, markets and business opportunities. With this information, companies can benchmark performance against the competition, defend intellectual property against infringement and counterfeiting, understand international trade trends and forecasts, support strategic decision-making and arbitrate trade disputes.

When global trade data is integrated and evaluated over the lifecycle of a product, reliable facts are generated much earlier. TradeFBIUSA's data enables business leaders to make informed sourcing decisions and identify and qualify specific suppliers of that product from around the world. This important data can be used early in the process to screen out potential suppliers of questionable character or a supplier at risk.

TradeFBIUSA provides Bilingual [on ground support staff](#) for component sourcing, factory audits, quality inspections, container loading confirmation, engineering support and more.

TradeFBIUSA will provide graphs and charts summarizing industry import trends to select publications Free of Charge! Contact Robert.levy (at) tradefbiusa (dot) com.

Watch for TradeFBIUSA at two upcoming trade shows in Las Vegas: AAPEX (Automotive Aftermarket Products Expo), November 3-5, Sands Expo Center (Booth 9623), and the National Industrial Fastener Show, November 16-18, Mandalay Bay (Booth 555).
