

Design Chain Associates, LLC and EPTAC Corporation Announce the Availability for Sale of the 448-Slide Deck Used for Their One-Day RoHS/WEEE Workshop

Design Chain Associates, LLC and EPTAC Corporation announce the availability for sale of the 448-slide deck used for the one-day workshop presented across the United States, Canada, and Mexico. This tome provides extensive and up-to-date information, insights, solutions, and links to source material that will help any company comply with the European Union's Restrictions on the use of certain Hazardous Substances (RoHS) and Waste Electrical and Electronic Equipment (WEEE) directives. The material covers not only what you need to know today but also the big picture of where Environmental Compliance is headed and what you need to do today to make sure you are prepared for the future. Legislation in China, Japan, and the United States are presented in detail

San Francisco, CA ([PRWEB](#)) August 16, 2006 -- Design Chain Associates, LLC and EPTAC Corporation announce the availability for sale of the 448-slide deck used for the one-day workshop presented across the United States, Canada, and Mexico. This tome provides extensive and up-to-date information, insights, solutions, and links to source material that will help any company comply with the European Union's Restrictions on the use of certain Hazardous Substances (RoHS) and Waste Electrical and Electronic Equipment (WEEE) directives. The material covers not only what you need to know today but also the big picture of where Environmental Compliance is headed and what you need to do today to make sure you are prepared for the future. Legislation in China, Japan, and the United States are presented in detail.

Unlike most workshops that key on a single topic, leaving out the other 80%, this covers the entire impacted business spectrum including supply chain, design, manufacturing, sales, field service, and brand image.

Ken Stanvick of DCA and Leo Lambert of EPTAC (also General Chairman of the IPC Assembly & Joining Committee), who developed, presented, and are maintaining this material, have received rave reviews from attendees of the most recent series of seminars, including:

- "Thank you very much for answering my questions, and giving me the tools that I need to complete my part complying with RoHS/WEEE directive. This seminar helped me a lot."
- "Fantastic seminar!"
- "I found the course material nearly overwhelming in breadth, but pleasingly replete in depth. I must read through it all again to make sure I am not missing something. Well done!"
- "A great seminar; very informative"
- "The seminar exceeded my expectations"
- "VERY EYE-OPENING, DID NOT REALIZE HOW MUCH NEEDS TO BE DONE"

This workbook is designed for OEMs, Distributors, Contract Manufacturers and Outsource Design and Manufacturing Firms. The contents will help these job functions and more:

Executive Staff - Product Management – Design Engineering – Manufacturing Engineering – Quality Engineering – Reliability Engineering – Procurement – Operations – Finance – IT and Document Control –

Sales and Marketing – Field Service

About Design Chain Associates, LLC

Design Chain Associates' services help Electronics OEMs speed product time-to-market, reduce supply chain risks, and lower costs while increasing engineering and procurement efficiency. DCA offers a variety of technical and management services related to EU and China RoHS and environmental compliance, including public and private seminars, product impact evaluation, personalized training, material composition acquisition, component engineering, Green BOM analysis, business process assessment and advice, and competitive advantage analysis. San Francisco-based DCA has a local presence in other high-tech regions of the country such as the Austin/Houston corridor and the Boston region as well as around the globe through local associates. For more information, visit DCA on the web at <http://www.designchainassociates.com>.

About EPTAC Corporation

EPTAC Corporation has been providing companies with the very latest in electronics production training since 1987. With several thousand students trained and certified, EPTAC continues to offer companies training in basics such as component identification and electrostatic discharge, all the way to advanced surface mount technologies and process automation. Founded in 1987, EPTAC offers a variety of training and certification programs to individuals and companies throughout the United States and Canada. EPTAC has developed an identity in the industry as a company capable of providing quality training and professional solutions to firms involved in electronics production. The company has grown from a single training program to providing over twenty-five (25) recurring training and certification classes and seminars. The programs that EPTAC currently delivers are based on industry standards such as IPC-A-610, J-STD-001, IPC-A-600, IPC-7711 and IPC-7721. For more information, visit EPTAC on the web at <http://www.eptac.com>.
