

Revolutionary Easy and Hassle-Free Dollhouse Lighting

Easy miniature and hobby lighting, no fuss, no mess. Lights within seconds! No more complicated electrical wiring to achieve realistic "greenlit" dollhouses, roomboxes, or miniature scenes.

Fort Lee, NJ ([PRWEB](#)) October 19, 2010 -- Manhattan Dollhouse has an EXCLUSIVE new series of miniature dollhouse LED lights that are battery powered and will look great in any Dollhouse, Room box or any Miniature Display Scene. Their lights are truly unique and beautiful, and are available as decorative wall sconces, attractive ceiling fixtures and eye-catching multi light chandeliers. All come immediately operational with batteries and an adhesive stick pad that can be instantly mounted on any interior or exterior walls. Dollhouse's and Room boxes can be lit up within seconds! These beautiful lights can be used instead of the wire operated lights, added to hard to reach places, or just an addition to your electrified dollhouse or miniature display. Extra batteries are included with each lamp and the mini LED bulbs last approximately 4000 hours, before replacements are needed. Many other styles, including crystal chandeliers, are available and in stock for immediate delivery. These lights can be found ONLY at FAO Schwarz and other select fine miniature stores around the country or online at www.manhattandollhouse.com
