

CBT Planet Adds New Perks to its IT Training and MCSE Boot Camps

IT training boot camp packages from CBT Planet, including MCSE boot camps, now offer several new additional benefits. Roundtrip airfare, transportation and hotel lodging are now included in all of CBT Planet's boot camp packages. CBT Planet offers training and certification with Cisco, Linux, Microsoft, Novell and other programs.

Chino, CA ([PRWEB](#)) April 16, 2007 – CBT Planet is proud to announce the addition of free services to its [IT training](#) and [MCSE boot camps](#). Now, participants in the company's IT certification boot camps can receive roundtrip airfare, transportation to and from the training location, free hotel lodging and overnight stays as a part of each boot camp package.

CBT Planet's boot camp training is accelerated learning for IT professionals who do not have a lot of time to learn computer software and hardware for Microsoft, Cisco, Oracle, CompTIA, Java, Novell, Project Management and more.

With CBT Planet's boot camps, IT professionals can take one to two weeks off for vendor-specific certification training instead of taking seven to eight weeks to learn the same material.

“Other services offer similar [IT training](#) and MCSE boot camps, but CBT Planet is one of the few to provide attendees the complete package,” says Hugh Nguyen, founder of CBT Planet. “With this new promotion, IT professionals and others planning to attend CBT Planet boot camps can look forward to their impending certification, rather than deal with the hassles of lodging and transportation.”

CBT training programs are hands-on, providing the training and experience that is vital to passing certification tests and performing successfully in the real world. The classes are offered in Atlanta, Georgia.

More information on CBT Planet boot camps, including the [MCSE boot camp](#), can be found at <http://www.cbtplanet.com/certification-boot-camps.htm>.
