

## **Casino Classic en français, s'il vous plaît : Full Service Online Casino Now in French**

*Casino Classic launches a French language version of its website so French-speaking players may now receive the quality of service English-speaking players have enjoyed for years.*

([PRWEB](#)) July 25, 2007 -- In late July, Casino Classic, a leader and pioneer in the online casinos industry, will launch a full service website catering to French online gamblers. This is no mini-site, as the French edition will boast over 70 pages for gamblers to peruse.

"Providing a full service online casino in a language other than English is a great accomplishment in the online casinos industry," claims Emma Hall, a representative from [www.casinoclassic.com/francais](http://www.casinoclassic.com/francais). "We must maintain player loyalty by catering to their needs and providing them with a comfortable online experience, and an online casino in French greatly aids a large portion of our players."

French players without English language skills will now be able to understand the full terms and conditions, casino bonus offers and various casino games rules and descriptions.

Furthermore, Casino Classic software is available in a variety of languages including English, French, German, Italian, Simplified Chinese and Japanese. The online casino also accepts various currencies from around the world.

The French edition of Casino Classic is due to launch towards the end of July 2007. Look for Casino Classic and its online casinos network to launch more sites in other languages in the near future.
