

The Eagle Soars -- Stress Causes ADHD, All Mental Disorders, Parkinson's Disease, Alzheimer's Disease and More -- Medicine, Science and Religion Merged

A medical technologist recovered from a 27-year course of central nervous system poisoning due to medical misdiagnoses, personal stress and caffeine. Several years later Ruth Whalen experienced symptoms of Parkinson's disease. Miss Whalen treated herself, recovered, researched, uncovered a medical and religious travesty, merged science, medicine and religion, and discovered how oppression, personal stress, and stressors poison the central nervous system and cause ADHD, Parkinson's disease, schizophrenia, autoimmune response and more.

Boston, MA ([PRWEB](#)) December 27, 2007 -- Today is the day that will go down in history as the day that science and religion merged, the day millions of psychiatric patients and neurology patients began their ascent back to good health, and the day that psychiatry, modern medicine, and the pharmaceutical industry began their descent.

According to Albert Einstein, science without religion is lame, religion without science is blind, the only source of knowledge is experience, and information is not knowledge. According to Isaac Newton, science and religion are interconnected. According to Ruth Whalen, a medical technologist with more than 15 years work experience in biochemistry, Einstein and Newton were correct. Ruth Whalen has discovered the body's second gear system, which causes methyl-alkaloid poisoning, which has been diagnosed as mental illness, Alzheimer's disease, Parkinson's disease, autism, anxiety, chronic fatigue, panic, and many other conditions for over 100 years. Ruth's articles about this travesty have been accepted for publication in Medical Veritas and the Journal of Orthomolecular Medicine. In addition, Ruth released *The Light: How Stress Poisons the Central Nervous System and Causes ADHD, Parkinson's Disease, Schizophrenia, Autoimmune Response and More* (ISBN: 9781430329916).

After Miss Whalen recovered from a 27-year course of poisoning due to caffeine and other stressors, Ruth wrote *Welcome to the Dance: Caffeine Allergy, A Masked Cerebral Allergy and Progressive Toxic Dementia* (Trafford, 2005), with the foreword written by A. Hoffer, M.D., Ph.D., President of the International Schizophrenia Foundation. Several years later, Ruth began experiencing symptoms of what is called Parkinson's disease. Ruth put her faith into Dr. Abram Hoffer's work, herself, and God, and she treated herself and recovered. Miss Whalen discovered how the body decreases dopamine production, how the body makes biohallucinogens, an autoimmune disease, and much more. Ruth's physicians have acknowledged her findings.

All this and more is documented in *The Light: How Stress Poisons the Central Nervous System and Causes ADHD, Parkinson's Disease, Schizophrenia, Autoimmune Response and More*. A. Hoffer, M.D., Ph.D. wrote the foreword to the first part of the book, which explains the biochemical imbalances and immunological abnormalities responsible for stress-induced illnesses. The second part of the book discusses religious mistruths, the importance of the right side of the brain, the brain's black hole and how it is connected to God and the universe, how stress causes cancer, and much more.

The Light: How Stress Poisons the Central Nervous System and Causes ADHD, Parkinson's Disease, Schizophrenia, Autoimmune Response and More is available for purchase at Lulu: [Lulu.com](#), and released *The Light: How Stress Poisons the Central Nervous System and Causes ADHD, Parkinson's Disease, Schizophrenia,*

Autoimmune Response and More (ISBN: 9781430329916). To preview or purchase the book:

Wilhelm Wundt, Sigmund Freud, and B. F. Skinner were atheists, and Emil Kraepelin studied under Wundt. They disregarded God and convinced other doctors and laypersons that the theories of schizophrenia, manic-depression, and other named mental disorders made sense, but the theories of so-called mental illness and many other named disorders have never been proven, and every good doctor knows that it is biologically impossible for the brain to change function without a change in the physical state.

Miss Whalen is not affiliated with any organization. A truth-teller and humanitarian, Ruth stresses that the money saved from unnecessary research can go toward feeding the children, housing the homeless, heating senior citizens, and taking care of United States veterans.

Today is the Feast of Saint John. Science, medicine and religion have merged. Today is the beginning of relief, peace of mind, and recovery for millions of individuals who have been medically and morally deceived. Circa 1901, H.G. Wells said that the day would come when "beings, now latent in our thoughts and hidden in our loins, shall stand upon this earth as one stands upon a footstool, and shall laugh and reach out their hands amidst the stars." Thanks to a courageous, intelligent, and humorous Irish woman who knows how to merge knowledge and information, that day has come. It is done.
