Adhesion Awareness Giveaway Offers Over $9,700 in Prizes

_Clear Passage Physical Therapy_ raises awareness for adhesion and adhesion related disorders (ARD) by giving away over $9,700 in treatment and lodging. This hands-on therapy, the Wurn Technique®, has shown positive results treating adhesion-related problems such as chronic pain, female infertility, endometriosis, and small bowel obstruction – a common life-threatening condition.

Gainesville, FL (_PRWEB_) August 30, 2011 -- Virtually all people have adhesions (internal scars). If you scrape your knee, have a fall, undergo surgery or develop an infection, adhesions form to surround the injured area. As the body heals, adhesions often remain at the site of the trauma, surgery, infection or inflammation.

Unfortunately, they can spread to nearby organs, muscles, or nerves, causing unexplained pain or dysfunction. Small but powerful adhesions can act like nylon ropes or straight-jackets, and can cause a myriad of health problems.

Adhesions are often an underlying cause of chronic pain, female infertility, endometriosis pain, and bowel obstructions. Because they are invisible on most diagnostic tests, such as x-rays, CT and MRI scans, they often go undiagnosed by physicians and health care professionals.

Clear Passage Physical Therapy has developed and researched non-invasive treatments for adhesions for over twenty years. Their non-surgical, hands-on therapy (Wurn Technique®) uses techniques that feel like a deep massage, to release adhesions that bind structures within the body. In published studies, most patients reported significant pain relief, and a return of function.

In honor of Adhesion Related Disorder (ARD) Awareness Month this September, Clear Passage will donate over $9,700 in treatment and lodging, to three prize winners. Patients who suffer from an ARD can enter this giveaway on the _Clear Passage website_ or on their _Facebook page_.

The grand prize winner will receive 20 hours of free treatment at Clear Passage’s national headquarters in Gainesville, FL and five days of lodging at a lovely Florida waterfront cottage (a $6,100 value). The second prize winner will receive 10 hours of free treatment (a $2,600 value), and the third prize winner will receive 20 percent off a 20 hour treatment program (a $1,040 value).

“Diagnosing adhesions can be confusing, because they often cross body systems,” says Clear Passage National Director Belinda Wurn, PT. “Many people go from specialist to specialist, sometimes for years, simply searching for a diagnosis. Their problems increase when they learn that the surgery to remove adhesions can often create more adhesions.”

“We are pleased to offer a non-surgical alternative to patients” she said. “It’s very gratifying to give adhesion sufferers back their lives.”

About Clear Passage Physical Therapy
Clear Passage Physical Therapy is a network of high quality physical therapy clinics specializing in hands-on
treatment of adhesions, chronic pain, infertility, endometriosis, and bowel obstruction. Clear Passage treats patients from all over the world. “About 20 percent of our patients are healthcare professionals,” Wurn said.

Clear Passage was co-founded by Larry and Belinda Wurn, a husband and wife team. It was born from Belinda’s own personal experiences and quest for relief from debilitating adhesion pain after surgery to remove cancer.

About the Wurn Technique®
The Wurn Technique® is a hands-on soft tissue manual therapy developed to treat adhesions, female infertility, pain, endometriosis, and bowel obstruction. This therapy is practiced exclusively at Clear Passage Physical Therapy clinics.
