Hemorrhoid Treatment Clinical Study Presented by Med-rite Laboratories at Recent Physicians Convention

Med-rite Laboratories presented clinical research about their FDA approved hemorrhoid treatment at the AAPIUSA Physicians convention.

Dallas, TX (PRWEB) June 28, 2013 -- Med-Rite Laboratories announces the successful completion of a clinical study for their FDA approved hemorrhoid treatment device.

At the AAPIUSA Physicians convention held on June 15th 2013 in Dallas,TX organized by TIPS, Dr. Hitesh B. Yagnik, MD, presented Med-Rite Lab’s clinical research and revolutionary approach in treating hemorrhoids.

Dr. Yagnik explained how the Med-Rite Cryotherapy device works and its superior results in treating pain and hemorrhage compared to conventional remedies. It is also found to be an effective treatment during the recovery period after the surgical removal of severe hemorrhoids. Dr. Yagnik addressed queries from physicians at the end of the presentation.

“Med-Rite Laboratories is pleased to have achieved this clinical milestone, which reflects our commitment to advancing treatments for hemorrhoid conditions, and constitutes a significant step toward improving quality of life for hemorrhoid patients who are in need of drug-free, therapeutic options,” said Ms. Gail Frank, president and manager of Med-Rite Laboratories.

During the study, the treatment device was found to have caused no side effects in pregnant women. The device is CE approved and currently sold in Europe, Middle East and Korea.

About Hemorrhoids
Often described as "varicose veins of the anus and rectum," hemorrhoids are one of the most common ailments, especially in adults ages 45 to 65. More than half of the population will experience hemorrhoids at some point in their lifetime. The average person suffers in silence for a long period before seeking medical care. Hemorrhoids are also common in pregnant women. (1)

About Med-Rite Laboratories: Stops Hemorrhoids Cold®
Med-Rite Laboratories is a Dallas-based, OTC pain management company that focuses on health care products for professional and retail distribution. The company developed a revolutionary approach towards treating one of the world’s most common ailments: hemorrhoids. The treatment device is patented, FDA and CE approved, drug-free, and kosher. The device was also tested and cleared by NAMSA (namsa.com), a testing laboratory that specializes in the safety evaluation of medical devices.
