

Albany, New York (PRWEB) September 08, 2013 -- A wood based panel is a general term for a variety of different board products, which have an impressive range of engineering properties. Wood based panels are primarily used in construction, packaging, and shipping. Wood based panels can be classified into different product segments such as softwood plywood, particle-board and medium density fiber board, decorative hardwood plywood and veneer (under 6mm thick), waferboard and other structural composite boards, insulation board and hardboard.

Growing deforestation leading to global warming has spurred the demand for efficient timber utilization, in turn driving the global wood based panels market. Technological advancements and increased efficiency in manufacturing of wood based panels is expected to bolster the demand for wood based panels. On the other hand, rapid increases in the cost of petroleum-based fuels and products continue to escalate the production and marketing costs of wood-based panel products, in turn hindering its growth.

Anticipated changes in incorporating newer definitions of structural-use panels by American Plywood Association is expected to bolster the demand for wood based panels in North America as well as South America. Rapid industrialization and modernization in infrastructure in developing economies of Asia Pacific is expected to be a key market driver for wood based panel industry over the forecast period.

Some of the key manufacturers of wood based panel include Caihong Wood Co. Ltd, Lin Shi Tong Wood Co. Ltd., d.i.v.a Aluminum products, Qingdao Nianlun Wood Processing Co. Ltd., Changzhou Hengyi Wood Products Co. Ltd., Donghwa Enterprise Co. Ltd., Daregroup, Mainland Trading Company, and Linyi Guangsha Wood Industry Co. Ltd. among others.

This research report analyzes this market depending on its market segments, major geographies, and current market trends. Geographies analyzed under this research report include:
North America
Asia Pacific
Europe
Rest of the World

This report provides comprehensive analysis of
Market growth drivers
Factors limiting market growth
Current market trends
Market structure
Market projections for upcoming years
This report is a complete study of current trends in the market, industry growth drivers, and restraints. It provides market projections for the coming years. It includes analysis of recent developments in technology, Porter’s five force model analysis and detailed profiles of top industry players. The report also includes a review of micro and macro factors essential for the existing market players and new entrants along with detailed value chain analysis.

Reasons for Buying this Report:
This report provides pin-point analysis for changing competitive dynamics.
It provides a forward looking perspective on different factors driving or restraining market growth.
It provides a technological growth map over time to understand the industry growth rate.
It provides a seven-year forecast assessed on the basis of how the market is predicted to grow.
It helps in understanding the key product segments and their future.
It provides pin point analysis of changing competition dynamics and keeps you ahead of competitors.
It helps in making informed business decisions by having complete insights of market and by making in-depth analysis of market segments.
It provides distinctive graphics and exemplified SWOT analysis of major market segments.
