Survey of Bio-pesticide Industry in China

Reportbuyer.com just published a new market research report: Survey of Bio-pesticide Industry in China

London (PRWEB) October 24, 2013 -- Bio-pesticides are certain types of pesticides derived from such natural materials as animals, plants, bacteria, and certain minerals. For example, canola oil and baking soda have pesticidal applications and are considered bio-pesticides. With people’s rising awareness of environmental protection and food safety, more and more attention has been paid to bio-pesticide, which enjoys advantages of no pollution, no residue, and high efficiency. So bio-pesticide has bright market outlook in the future.

This intelligence report attaches importance to the following parts:

- Update all the data related to bio-pesticide industry from technical and formulations in China in the past years, including registration, supply, export, price, demand, etc.
- Pay close attention to what technology they are using and how they achieved the technology.
- Identify the leading players and emerging products of bio-pesticide industry in China.
- Emphasize on demand volume of bio-pesticides market in 2009-2012, as well as the consumption structure by crops.
- Figure out the development status and influencing factors including drivers and barriers.
- Get a clear understanding of the future development trend, and identify China’s position of bio-pesticide industry from a global perspective.
- Explore commercial opportunities of bio-pesticide industry in China under the context of the new global economy situation.
- SWOT analysis of top 5 domestic bio-pesticides players

Ten major bio-pesticides studied in this report:

- Abamectin
- Bacillus thuringiensis
- Matrine
- Azadirachtin
- Pyrethrins
- Heliothis armigera NPV
- Jinggangmycin
- Bacillus subtilis
- Polyoxin
- Kasugamycin
- Bacillus cereus
- Agricultural antibiotic 120
- Gibberellic acid
Executive summary 1
Introduction and methodology 4
1 Overview of pesticide industry in China 7
2 Production situation of bio-pesticide in China 15
  2.1 The development history of bio-pesticide industry 15
  2.2 The position of bio-pesticide in pesticide industry 15
2.3 Current production situation of bio-pesticide industry in China 18
  2.3.1 Summary of production & manufacturers 18
  2.3.2 Current production situation of major bio-pesticides 19
    2.3.2.1 Bio-insecticide 23
      2.3.2.1.1 Abamectin 23
        2.3.2.1.1.1 History of abamectin 23
        2.3.2.1.1.2 Registration situation 24
        2.3.2.1.1.3 Technology 26
        2.3.2.1.1.4 Raw material 28
        2.3.2.1.1.5 Current production situation, 2009-2012 32
        2.3.2.1.1.6 Price of abamectin in China 37
        2.3.2.1.1.7 Export and import situation, 2010-2012 39
        2.3.2.1.1.8 Consumption situation, 2009-2012 49
        2.3.2.1.1.9 Future forecast, 2013-2017 50
      2.3.2.1.2 Bacillus thuringiensis 53
      2.3.2.1.3 Matrine 63
      2.3.2.1.4 Pyrethrins 80
      2.3.2.1.5 Heliothis armigera NPV 90
    2.3.2.2 Bio-fungicide 99
      2.3.2.2.1 Jingangmycin 99
      2.3.2.2.2 Bacillus subtilis 108
      2.3.2.2.3 Polyoxin 115
      2.3.2.2.4 Kasugamycin 125
      2.3.2.2.5 Bacillus cereus 133
      2.3.2.2.6 Agricultural antibiotic 120 140
    2.3.2.3 Bio-plant growth regulator 147
  3 Problems existing in bio-pesticide industry 158
4 Technology level and research status of bio-pesticide in China 160
5 Policy and regulation and the influence to bio-pesticide industry 167
6 The trade of Bio-pesticide in China 175
  6.1 Price and its trends 175
  6.2 Distribution channel 175
  6.3 Export and import situation 176
  7 Use of Bio-pesticide in China 179
  7.1 Consumption volume 179
  7.2 Use situation in crop 183
  7.3 Farmer’s habits and attitudes 186
8 Prospect of Bio-pesticide in China (2013–2017) 188
9 Conclusions 191
10 Appendix 194
