EnSoftek, Inc. Wins Peace Corps Global Electronic Medical Records (EMR) System Development and Implementation Contract

EnSoftek, Inc. announced a five-year contract award with the US Peace Corps to develop and implement a new global Electronic Medical records (EMR) system, known as PCMEDICS using OpenEMR/DrCloudEMR, Dynamics CRM, SharePoint, BizTalk and SQL Server platforms and applications.

Beaverton, OR (PRWEB) November 07, 2013 -- The overall intent for PCMEDICS is to provide an electronic medical record system to capture the healthcare delivered at each overseas post by Peace Corps Medical Officers (PCMOs) and U.S.-based Peace Corps clinical staff, and to provide a database to access quality of care and business processes.

The scope of EnSoftek’s contract is to provide 1) an electronic medical record system; 2) a practice management system (PMS); 3) a reporting system; 4) a base medical supply inventory tracking system; and 5) technical documentation and training.

EnSoftek’s Teaming Partners on this contract includes Medical Information Integration (www.mi-squared.com/), a firm with extensive development, implementation and certification experience of the OpenEMR EHR system and Webfortis (www.webfortis.com), a Microsoft Gold Customer Relationship Management Competency Partner and a leader in developing and deploying Microsoft Dynamics CRM solutions.
