New Concept in Treating HIV and AIDS. The work of Dr. Harold D. Foster

Dr. Harold Foster, president of HD Foster Research Inc. and author of the book, "What really causes AIDS" has developed a safe and low cost approach to help people with HIV and AIDS. Dr. Foster's approach addresses the extreme nutritional deficiencies found in people with AIDS by applying the concept of "total deficiency targeting". Dr. Foster claims his approach helps people with HIV and AIDS to overcome competition from the HIV virus for specific critical minerals and amino acids in their bodies.

(PRWEB) April 4, 2004 -- Dr. Harold Foster, president of HD Foster Research Inc. and author of the book, "What really causes AIDS", has developed a safe and low cost approach to help people with HIV and AIDS. Dr. Foster's approach addresses the extreme nutritional deficiencies found in people with AIDS by applying the concept of "total deficiency targeting". Dr. Foster claims his approach helps people with HIV and AIDS to overcome competition from the HIV virus for specific critical minerals and amino acids in their bodies.

Dr. Foster has been responsible for providing advice on the formulation of products presently undergoing clinical trials in Africa. Preliminary reports from Botswana apparently indicate a recovery rate exceeding 90%. Dr. Foster has also been providing products at his own expense to help people with HIV and AIDS in Africa.

Dr. Foster's approach is consistent with treatment regimes promoted by South Africa's Minister of Health, Dr. Tshabalala-Msimang, a physician and obstetrician, and the general principles of the VITAGRANT program operated by the Clinical Directors Network, Inc. in New York.

The January/February 2004, and March/April 2004 issues of Nexus Magazine also contain recent articles written by Dr. Foster about the treatment of AIDS. These articles are available at www.nexusmagazine.com/articles/aids.selenium.html and www.nexusmagazine.com/articles/aids.selenium2.html.

Dr. Foster has published over 230 books and articles. A complete list of his publications is available at www.hdfoster.com.

In the US, Dr. Foster can be reached by telephone (250) 721-7331, or by email at fosterhd@fosterlabs.com.
