Center for Emotional Restructuring LLC Announces Owner Dr. Robert A. Moss Has Joined the Washington Medical Group in Washington, DC

The move allows the Clinical Biopsychological approach to psychotherapy, including Emotional Restructuring, to be available in the nation’s capital. He joins the multispecialty group which will allow comprehensive care for patients.

Greenville, SC (PRWEB) June 30, 2014 -- Robert A. Moss, Ph.D., FACPN, FAACP, is a clinical psychologist and neuropsychologist who will begin seeing patients at the Washington Medical Group on July 22. Located at 1327 18th Street NW, Washington, DC 20036, the group has two other neuropsychologists, two clinical psychologists, a psychology intern, and multiple graduate students. Dr. Moss will act as the head of the clinical psychology team. Within the clinic there are medical specialists in neurology and family practice, as well as chiropractic physicians.

Over his 33 year career Dr. Moss has had extensive clinical and research experience in a variety of conditions, including depression, anxiety, and chronic pain. He has conducted psychological and neuropsychological evaluations in both clinical and forensic situations. At the Washington Medical Group, Dr. Moss will supervise a comprehensive program that provides assessment and treatment of patients’ neuropsychological and emotional problems and coordinates their care with the other practitioners in the clinic.

He is board certified in clinical psychology through the American Board of Professional Psychology and in neuropsychology through the American Board of Professional Neuropsychology. This allows him to be a Fellow in both the American Academy of Clinical Psychology and the American College of Professional Neuropsychology. He is currently licensed as a psychologist in South Carolina, Missouri, and Washington, DC.

The Center for Emotional Restructuring closed as a practice in 2011 in Greenville, SC, when Dr. Moss accepted a position as an associate professor. The website has been maintained as an educational source and location where the professional and lay books written by Dr. Moss can be found. The website will reflect the fact that Dr. Moss is providing outpatient treatment exclusively through the Washington Medical Group.

Previously, Dr. Moss had over 20 years in his own private practice and has been working as a neuropsychologist at Bon Secours St. Francis Hospital in Greenville, SC, the past two years. During the past two years he has authored a number of articles on a cortical column-based model of brain functioning and how this applies to psychological problems and their treatment.

The articles he has written in this area are available at ResearchGate.com and Academia.edu. References on the articles are as follows:

Dr. Moss has authored over 50 professional articles and presented at numerous regional, national, and international conferences. He is the editor-in-chief of AIMS Neuroscience which has a theoretical emphasis and had its inaugural issue last week.
