ASRC Federal InuTeq Awarded NASA Program Analysis and Control Contract

ASRC Federal InuTeq has been awarded the PAAC IV contract supporting NASA’s Goddard Space Flight Center in Greenbelt, Md. The company will provide specialty IT services that support critical NASA missions.

Beltsville, Md. (PRWEB) December 16, 2014 -- NASA has awarded the Program Analysis and Control IV contract to ASRC Federal InuTeq. The five-year contract, primarily supporting NASA’s Goddard Space Flight Center in Greenbelt, Md., is valued over $290 million.

Under the contract, ASRC Federal InuTeq will provide a wide range of business services, including planning and scheduling, configuration management and documentation support. Additionally, ASRC Federal InuTeq will provide specialty IT services that support critical NASA missions.

“We are proud to have earned the opportunity to continue our partnership with NASA Goddard Space Flight Center on the PAAC IV contract,” said Mark Gray, ASRC Federal president and CEO. “Our team is well-equipped to deliver the evolving services needed to help enable scientists and engineers to focus on NASA’s space exploration missions.”

NASA Goddard Space Flight Center is one of NASA’s major field centers and is dedicated to the development and operation of unmanned spacecraft for scientific research. Since its inception in 1959, NASA Goddard has been involved in numerous key agency programs.

About ASRC Federal
ASRC Federal comprises a family of companies that deliver engineering, information technology, logistics and technical services and solutions to U.S. civil and defense agencies. ASRC Federal companies have employees in over 40 locations across the U.S. focused on providing reliable, cost-efficient services that help government customers achieve mission success.
