Supa Herbal Greens Receives USDA Organic Certification

Achieving USDA Organic Certified status means that each of the ingredients in the product meets the requirements of the National List of Allowed and Prohibited Substances. In addition, the entire manufacturing process has been validated by a USDA National Organic Program authorized certifying agent as following all USDA organic regulations.

San Antonio, Texas (PRWEB) January 22, 2015 -- Max Koutny, president and founder of Supa Herbal Greens, today announced that the all natural food supplement company, a division of Natures Brands, has been "USDA Organic Certified." Supa Herbal Greens is a super nutritious food supplement that provides 100% organic and all natural green vegetables, whole grains, vitamin rich seeds and enzymes in capsule and power form. Made from pure, raw 'certified organic' ingredients, Supa Herbal Greens is formulated for vegetarians and vegans and infused with the natural, antioxidant powder of plant - based ingredients.

To meet the USDA Organic Certified qualification, a manufacturer, grower or product handler must meet a set of stringent requirements under the USDA's National Organic Program (NOP). Receiving the USDA Organic Certification Seal demonstrates a company's ongoing commitment to a healthy planet and assures consumers and buyers that the company, products and individual ingredients meet the NOP guidelines in regard to the National List of Allowed and Prohibited Substances.

Supa Herbal Greens is very pleased to be USDA Organic Certified," states Max Koutny. "This certification demonstrates our effectiveness and ongoing commitment to producing a food supplement that is totally free of preservatives, additives, and chemical fillers. As pioneers in the food and health products industry, we brought Supa Herbal Greens to the public in 1995 after we noticed that our food sources were starting to change and genetically modified food (GMOs) was making its way onto the market.

"Since that time, we have worked very hard to meet all of the USDA Organic Certification requirements and are very proud to be announcing this certification today. While we can't stop food manufacturers and growers from putting potentially harmful chemicals in their food products, we can offer consumers a healthy alternative. As we go forward, we will continue to remain true to our brand by keeping our products 100% organic and all - natural so they are safe to consume, each and every day."

Supa Herbal Greens is made with raw, whole food so there are no additives, preservatives, enhancers or fillers being used to replace any percentage of the product. Used once or twice a day, Supa Herbal Greens supplements provide 100% nutrition in a super - nutritious, compact formula that is easy to digest, easy to absorb and available to take on the road or use at home. The USDA Certified Organic stamp means that it is of the highest grade of all - natural and organic food. Supa Herbal Greens is a division of Natures Brands, which also manufactures and distributes Herbal Choice Mari Natural and Organic Skincare Products, Bella Mari all natural beauty products, Acid-2-Alkaline all natural organic supplements, and all natural, organic PhytoVitamins.
