Bird-X Employees Reflect on the 2017 National Hardware Show

The National Hardware Show took place in Las Vegas, NV last month, with Bird-X in attendance at booth #10558. Showcased was the Cozy Pet Warmer, a new release by Cozy Products®, a division of Bird-X.

Chicago, IL (PRWEB) June 01, 2017 -- With thousands of exhibitors representing 15 product categories, the National Hardware Show is the perfect place for store owners, distributors, and manufacturers to meet. The show has a longstanding history spanning over 70 years in the home improvement marketplace.

Along with humane Bird Control products, Bird-X also introduced Cozy Products® latest release, the Cozy Pet Warmer. The Cozy Pet Warmer is a radiant heating panel for pets that is safe to have in contact with other surfaces and has a wire-wrapped, chew-resistant cord.

Stuart Wilkins, a National Account Manager for Bird-X, was in attendance. “We were mainly focused on our new Cozy Pet Warmer and Cozy Coop for backyard chicken coops. We are having great success with our plug-in pest repeller for mice and insects, as the competing products only advertise that theirs chase mice. Our target is to continue to expand Pest-X into the Home Improvement and Hardware channels and grow from there.”

Bird-X’s 3D Coyote Predator Decoy was also a fan favorite at the show, garnering double takes and inquiries from many passersby.
