Male Fertility & Sexual Medicine Specialists to Offer New Minimally Invasive Procedures for Sperm Retrieval

*Practice founder, Martin D. Bastuba, MD, will lead effort to provide San Diego patients with two new, minimally-invasive outpatient sperm retrieval procedures, TESA and PESA.*

San Diego, California (PRWEB) June 26, 2017 -- Dr. Martin Bastuba, MD, FACS, founder and Medical Director of Male Fertility & Sexual Medicine Specialists, in collaboration with the Fertility Center of California, is pleased to announce the addition of two new outpatient treatments for male fertility care: PESA (percutaneous epididymal sperm aspiration) and TESA (percutaneous testicular sperm extraction). These minimally invasive treatments are primarily used to assist men who have experienced a blockage (such as a vasectomy), and need to *retrieve sperm* for in vitro fertilization (IVF) or intracytoplastic sperm injection (ICSI).

PESA is performed by inserting a needle through the scrotum into the epididymis to collect sperm, and TESA collects sperm from testis tissue collected with a very small needle through the skin. Both procedures provide male patients with sperm samples needed for IVF. A significant benefit of *PESA and TESA* is that both procedures can be completed within 30 minutes, with minimal discomfort and interference to the patient’s schedule.

“We understand the busy schedules of our patients and are pleased to accommodate them with PESA and TESA, treatments they can fit into any day,” said Dr. Bastuba. “Our Premium Package achieves sperm retrieval with a minimally invasive approach, and allows our male patients to quickly resume their schedules, making the entire sperm retrieval process as seamless as possible.” The Executive Premium Package is an upgraded option of the procedures that includes Exparel, which provides patients with 72-hours of complete pain relief.

Dr. Bastuba represents an elite two percent of board certified Urologists in the country who have completed fellowship training in male fertility, and has built a reputation for his excellence in medical care in San Diego and throughout the world.

For more information regarding PESA/TESA procedures or to make an appointment, please *contact the Male Fertility & Sexual Medicine Specialists* at (619) 286-3520.
