About Dr. Grace

Dr. Grace’s story of becoming a dentist is no small feat. Her family immigrated to the United States from South Korea in the 1980s. Having parents not fluent in English, Grace had to tackle academics on her own while overcoming language barriers herself. Dr. Grace still isn’t quite sure how she did it, but she did. She went on to the University of Oklahoma on a dance scholarship where she graduated with a degree in psychology.

However, it wasn’t until the age of 33, after getting married and having kids that she turned her sights on dentistry. With her children still very young, she was able to get into the University of Oklahoma College of Dentistry. With the support of her family, continuous hard work and a true skill set for dental aesthetics and patient care, she is where she is today doing what she loves most.
