Allergy Technologies, Manufacturer of ActiveGuard, Named a Supply Partner by Hilton Supply Management

ActiveGuard Mattress Liners are the ONLY EPA-registered Product Labeled for Two-Year Prevention of Bed Bug Infestations

AMBLER, Pa. (PRWEB) January 03, 2019 -- Allergy Technologies LLC, a leading science-based manufacturer of innovative, effective, consumer-friendly pest control products, has been named a supply partner by Hilton Supply Management, the global supply chain partner for more than 6,000 properties, including Hilton and non-Hilton-branded hotels. Allergy Technologies is the manufacturer of ActiveGuard® Mattress Liners, the only EPA-registered, proactive product labeled to prevent bed bug infestations for two years. They are the first mattress liners to work against bed bugs – even new, more resistant strains. In hotel use for years, ActiveGuard-based preventive programs have proven to reduce infestations as much as 90 percent or more.

ActiveGuard liners kill bed bugs in or on mattresses and box springs and are effective in both active and preventive bed bug control strategies. Maintenance-free and non-disruptive to hotel operating efficiencies, the liners work 24/7 for two years protecting both guests and bedding from bed bugs. ActiveGuard comes in four bed sizes and are easily installed by one person.

Extensively evaluated in field studies, ActiveGuard’s ability to save hoteliers hundreds of thousands of dollars in operational expense while preserving brand reputation is well documented in “Do Not Disturb,” an editorial by Jeff Fenner in the June 15, 2016 PCT Magazine Bed Bug Supplement. In a large convention hotel that is part of a major brand hotel chain, ActiveGuard installed on box springs facility-wide (1,600 rooms) was successful in preventing infestations over a two-year period while providing protection against potential bed bug related litigation.

“Bed bugs are a pest that notoriously plague properties with high client turnover, which makes proactively addressing the bed bug resurgence even more critical for hotels,” added Joseph Latino, President of Allergy Technologies. “The financial benefits of preventing bed bugs are clear: reducing operational expenses, increasing hotel revenues, preserving the hotel’s reputation, enhancing guest confidence and reducing legal liability.”

Allergy Technologies offers the only performance guarantee against bed bugs when using ActiveGuard to prevent infestations. For a period no longer than two years from the time of purchase, if one or more bed bugs are found in contact with an ActiveGuard Mattress Liner and continue to be alive after seventy-two hours of contact, Allergy Technologies will either replace the liner at no cost to the property or reimburse the property for their purchase price of the liner. For more details about the guarantee, please visit the Allergy Technologies website at www.AllergyTechnologies.com.

About Allergy Technologies LLC

Allergy Technologies LLC is committed to the creation and manufacture of innovative, effective and consumer-friendly products addressing major issues in both pest control and healthcare. The company’s product claims are always the result of scientific truth and rigor. ActiveGuard Mattress Liners are available for purchase by pest control professionals and distributors; hoteliers; colleges and universities; property management;
federal, state and local housing; cruise lines; and homeowners. Allergy Technologies is a subsidiary of A. Carey Co. LLC, which focuses on using philanthropy as a core business strategy for its businesses. Through its PhilanprofitSM strategy, a portion of all ActiveGuard proceeds go to help fund inner-city homeless and women's shelters and asthma clinics.
