Alexander A. Villarasa M.D.’s Newly Released “Random Thoughts” Is a Compelling Discussion on the Factuality of Evolution in God’s Power of Creation

“Random Thoughts” from Christian Faith Publishing author Alexander A. Villarasa M.D. is an illuminating compendium of insights and revelations on topics like miracles, faith, humanity, time, life, and many more that will allow one to reflect about the true meaning of all this God-given existence of things.

MEADVILLE, Pa. (PRWEB) May 17, 2019 -- “Random Thoughts”: an insightful guide to understanding the randomness or non-randomness of what’s existing. “Random Thoughts” is the creation of published author Alexander A. Villarasa M.D., a graduate from the University of Santo Tomas in Manila, Philippines in 1972. After completing a three-year internship and residency program in pediatrics, he’s been in private practice in various locations in Southern California since then, the current one being Palm Springs.

Dr. Villarasa shares, “I titled this book Random Thoughts overtly tongue-in-cheek because, as I have argued in the introduction and preface, I do not believe in anything random about why and how we exist in a nonrandom universe. I strongly believe in creationism, one that does not deny the factuality of evolution in that creative process. The way I see it, the universe and our existence were schemed, designed, and finely-tuned by a transcendent supremely sentient impulse—God—who is not into acts of futility.

"The essay titled ‘It’s All about God’ specifically argues the idea that God’s creation of sentient beings—us—was His act of utmost utility because if we are not here to perceive, experience, and witness the universe in all its glory, it would just be cold, dead space out here, there, and everywhere with neither usefulness nor timeliness.”

Published by Christian Faith Publishing, Alexander A. Villarasa M.D.’s new book is a perceptive read that brings light to the nature of existence and draws one to think that nothing could actually be random about these acts of creation—that rather, it is all and purely divine intelligence.
