M&S® Technologies, Inc. Receives Patent for Clinical Trial Technology

M&S® Technologies, Inc. receives patent for Clinical Trial Technology

NILES, Ill. (PRWEB) May 29, 2019 -- M&S Technologies, the first name in computerized vision testing systems, is pleased to announce that it has received US Patent 10,244,938. M&S presents a testing method that provides a reliable, repeatable accurate testing of a patient in a reduced amount of time. This allows consistent data generation from site to site and visit to visit while greatly reducing data collection and dissemination expense.

The M&S - Clinical Trial Suite testing method includes a display, presenting the first line of optotypes wherein each line progressively decreases in size and in contrast of the optotype relative to the background. The patient identifies the line of optotype in which the patient can correctly identify all optotypes in the first chart. Then a second chart is presented wherein each line gets progressively smaller. The method may include randomizing the optotypes on the second chart. The method proceeds through until the patient is no longer able to correctly identify any of the optotypes on a line. The correct number of results by the patient is promptly recorded.

The next opportunity to demo the Smart System® 2 will occur at the AOA-OD meeting on June 20-21, booth 523.

“M&S Technologies strives to perfect the technology of computerized visual acuity testing,” Said Joseph Marino, CEO-M&S Technologies, Inc. “We are continuously looking for ways to improve our software technology and provide the most efficient product for both the patient and clinician. Our Clinical Trial Suite succeeds at both”

About M&S Technologies:
Founded in 1990, M&S Technologies is a software company specializing in vision testing systems and dedicated to developing the very best products for eye-care professionals, optometry schools and universities, and products used in clinical trials. To date, over 28,000 systems are in use across 39 countries with a growing network that includes 23 distributors and several strategic industry alliances. Superior service, industry-leading technology and products that define the cutting edge have been the hallmarks of M&S for over 29 years.
