American Academy of Thermology (AAT) Holding AAT Physician Thermography Interpretation Course Sep. 6, 2019 in Atlanta, GA

The course will take place the day before AAT’s 2019 Annual Meeting & Scientific Session at the Emory University Conference Center in Atlanta, GA.

GREENVILLE, S.C. (PRWEB) June 10, 2019 -- The American Academy of Thermology (AAT), which is the premiere organization in North America for the scientific development, healthcare training and clinical application of medical infrared imaging, has announced that it will be holding a Physician Thermography Interpretation Course on September 6, 2019.

The course, which will take place the day before AAT’s 2019 Annual Meeting & Scientific Session at the Emory University Conference Center in Atlanta, GA, will provide participants with a brief didactic review of:

- Clinical Objective Criteria for Related NMSK Disorders
- Vasomotor Mapping and Differential Diagnosis for NMSK Conditions
- Sympathetic Skin Response Generators Studies and RSD Lookalikes
- AAT Clinical Guidelines for the Use and Applications of NMSK Thermography
- Breast Thermography as Risk Health Assessment
- AAT Clinical Guidelines on Breast Thermography
- Thermography Applications in Oral Systemic Disorders
- AAT Clinical Guidelines on Oral-Systemic Thermography
- NMSK, Breast, and Oral-Systemic Thermographic Test Protocols
- Thermographic Report Format and Content
- Thermographic Findings, Thermographic Impressions, and Clinical Impressions for NMSK Studies, Breast Studies, and Oral-Systemic Studies, respectively
- Administrative and Office Based Thermography Issues

Participants will also receive resource materials including articles, publications, journals, and a certificate of participation.

More information on the AAT’s Pre-Meeting Physician Thermography Interpretation Course on September 6, 2019 is available at https://annualmeeting.aathermology.org/physician-thermography-interpretation-course-registration. Registration must be made in advance, and is separate from the AAT’s 2019 Annual Meeting & Scientific Session on September 7-8, 2019.

About the American Academy of Thermology

Founded in 1971, The American Academy of Thermology (AAT) is the premiere organization in North America for the scientific development, health care training and clinical application of medical infrared imaging. The AAT provides a forum for those who have interest in medically-related conditions that involve the autonomic nervous, peripheral vascular and immuno-inflammatory systems. The organization also holds annual conferences for the presentation of scientific and professional papers, and serves as the voice of its members in medical practice, health care finance, legislative and regulatory related matters.
