Fasoo achieves Cybersecurity Malaysia standards conformation, paving its way to Southeast Asia markets

Fasoo, a leader in data-centric security, announced today that they have acquired Cybersecurity Malaysia standards conformation for Fasoo Enterprise DRM (Digital Rights Management) in accordance with AKSA MySEAL, National Trusted Cryptographic Algorithm List for Malaysia.

Seoul, South Korea (PRWEB) June 17, 2019 -- Fasoo, a leader in data-centric security, announced today that they have acquired Cybersecurity Malaysia standards conformation for Fasoo Enterprise DRM (Digital Rights Management) in accordance with AKSA MySEAL, National Trusted Cryptographic Algorithm List for Malaysia.

Fasoo Enterprise DRM (Digital Rights Management) is the most advanced file-based security solution, featuring native support for various business productivity applications such as Microsoft Office, Acrobat Reader and AutoCAD; and custom connectors are available for various third-party applications for seamless user experience. With the cutting-edge technology solution by Fasoo, organizations can safely share confidential documents internally and even externally without losing control over the sensitive documents and worrying about any intentional or inadvertent information loss.

The rigorous conformation testing was conducted by the Cybersecurity Malaysia team on Fasoo Enterprise DRM as part of roll-out of the Fasoo Enterprise DRM solution to various government agencies for protecting classified government records under the direction of an umbrella organization responsible for e-Governance, modernization and reformation of Malaysian Government agencies.

“Meeting the Cybersecurity Malaysia standards means that customers in Malaysia as well as in Southeast Asia region can now leverage the cutting-edge technology of Fasoo Enterprise DRM to protect their information persistently, while ensuring compliance with various national and international regulations including Personal Data Protection Act (PDPA), GDPR and PCI-DSS etc.,” stated Kangman Lee, Senior Executive Vice President of Fasoo.

Lee also expressed gratitude to Crest Infosolutions, a Fasoo’s certified partner, for coordinating the conformation testing and for a successful roll-out of Fasoo Enterprise DRM solution to customers in Malaysia and Hong Kong.

“Digital data security is the biggest challenge faced by enterprise worldwide. Robust data security platform, superior technical support and flexibility in pricing and engagement models are the hallmark of our partnership with Fasoo,” added Hemant Prasad, CEO of Crest Infosolutions. “The conformation to the Cybersecurity Malaysia Cryptography Standards by Fasoo will add the much needed assurance about the maturity and robustness of Fasoo platform.”

About Cybersecurity Malaysia
Cybersecurity Malaysia is the national cybersecurity specialist and technical agency under the purview of the Ministry of Communications and Multimedia Malaysia, committed to providing a broad range of cybersecurity innovation-led services, programs and initiatives to help reduce the vulnerability of digital systems, and at the same time strengthening Malaysia’s self-reliance in cyberspace. It develops guidelines and best practices
related to information security, promotes Information Security Management System (ISMS) and contributes towards standardization development at national and international level.
