Dentist Dr. Tye Thompson Attends AAID Conference to Improve Dental Implant Care in Midland, TX

Midland, TX dentist, Dr. Tye Thompson, attends the American Academy of Implant Dentistry’s (AAID) 68th Annual Conference, “Synergy and Success.” During this prestigious event, he also received official recognition as a Diplomate of the AAID as well as the American Board of Oral Implantology.

MIDLAND, Texas (PRWEB) November 21, 2019 -- Respected dentist, Dr. Tye Thompson of The Dental Studio of Midland, attended the 68th Annual Conference of the American Academy of Implant Dentistry (AAID). During this event he was also awarded as a Diplomate of the AAID and the American Board of Oral Implantology. Striving to offer the latest treatment options, he attended this conference and achieved Diplomate status in order to provide the most cutting-edge dental implant care to his Midland, TX patients. This year’s conference, titled “Synergy and Success,” was designed to foster the community of implant dentistry, optimize patient care and provide attendees with relationships that last beyond the conference. Dr. Thompson will use this experience to enhance the treatments he provides at The Dental Studio of Midland along with his colleagues, Drs. Jordon Green and Mallory Layman.

While at the conference, Dr. Thompson was honored as a Diplomate of the American Academy of Implant Dentistry and the American Board of Oral Implantology. The certification process to gain this prestigious recognition is comprehensive and consists of a written and oral examination that covers all aspects of implant dentistry. To be eligible, applicants must:
- Provide evidence of an active dental license
- Have seven or more years of experience in the practice of implant dentistry
- Have completed at least 75 implant cases
- Successfully complete both the Part I and Part II examination within four years

The AAID conference focused on providing clinicians with industry leading dental implant continuing education. The conference took place in Las Vegas, NV and included staff education, hands-on learning, exhibitors as well as keynote speakers. The goal of “Synergy and Success” was to provide attending clinicians with:
- The opportunity to learn from leading practitioners
- Up to 20 hours of continuing education
- Hands-on workshops and live surgery
- Access to top technologies

Dr. Thompson is applying the skills and techniques learned at the conference to his dental implant treatments at The Dental Studio of Midland. A dental implant is a lifelike tooth replacement option that mimics the proper form and function of a natural tooth. “A dental implant provides the opportunity for a patient to be restored to normal aesthetic contour and function, just as they would by having a natural tooth,” says Dr. Thompson. “A dental implant really provides benefits to patients with missing teeth. They are able to chew, function and maintain a good smile aesthetic.”

The Dental Studio of Midland offers comprehensive dental implant care, from tooth extractions to bone grafting, implant placement using guided technology and restoration. Patients can also receive sedation dentistry for added comfort. Once the dental implant treatment is complete, patients can benefit from enhanced...
smile aesthetics, a boost in self-confidence, improved oral health and an improved diet. With proper care and maintenance, dental implants can last patients for the rest of their lives.
