AuntMinnieEurope announces EuroMinnies 2020 awards for excellence in radiology

Nominations are now being accepted for the EuroMinnies event recognizing excellence in European radiology

CHESTER, England (PRWEB) November 25, 2019 -- Radiology portal AuntMinnieEurope.com has launched the 2020 EuroMinnies, the second edition of the annual awards event designed to recognize achievements in European radiology.

The award scheme aims to recognize the major clinical and technological advances being made in European radiology, according to Philip Ward, editor in chief of AuntMinnieEurope.com.

"From Wilhelm Roentgen's discovery of x-rays in 1895 to today's pioneering research in areas such as artificial intelligence, Europe has been the scene of some of the most important milestones in medical imaging," Ward said. "We are pleased that the EuroMinnies will enable us to acknowledge and publicize many of these achievements."

The EuroMinnies awards will be made in eight categories:
- Most Influential Radiology Researcher
- Most Effective Radiology Educator
- Radiology Rising Star
- Most Significant News Event in European Radiology
- Scientific Paper of the Year
- Best New Radiology Device
- Best New Radiology Software
- Best New Radiology Vendor

AuntMinnieEurope has begun accepting nominations for the EuroMinnies from members of the medical imaging community. Winners will be selected by an expert panel of radiology luminaries, with winners announced prior to the 2020 European Congress of Radiology.

About AuntMinnieEurope.com
AuntMinnieEurope.com is the premier online destination for radiologists, radiation therapists, interventional radiologists, and related professionals in the European medical imaging industry. AuntMinnieEurope.com and AuntMinnie.com feature the latest news, communities, continuing medical education, and board review education for medical imaging physicians, clinicians, residents, and medical students across the world. AuntMinnieEurope.com and AuntMinnie.com are part of Science and Medicine Group, the leading research and advisory firm serving the life science, analytical instrument, diagnostic, healthcare, radiology, and dental industries.
