Oral Surgeon, Dr. William Lane, Offers the Gold Standard of Tooth Replacement with Full Mouth Dental Implants in Plymouth and Sandwich, MA

Dr. William Lane, oral surgeon in Plymouth and Sandwich, MA, places dental implants to replace missing and failing teeth. While the dental implant cost can vary from patient to patient, the results are often life changing and can give patients the confidence to smile again.

PLYMOUTH, Mass. (PRWEB) February 04, 2020 -- Lane Oral Surgery provides a permanent and long-term solution to tooth loss through dental implants. Dr. William Lane, respected oral surgeon in Plymouth and Sandwich, MA, places full mouth dental implants to restore the smile, function and quality of life of patients who are living with missing or failing teeth. While the cost of dental implants can vary, Lane Oral Surgery does everything they can to make the solution affordable and beneficial for patients.

“At Lane Oral Surgery the costs of dental implants are revealed and explained to you before any treatment is undertaken so patients have an understanding of what the financial perspective will look like," says oral surgeon, Dr. Lane. “The implants that we place are top brand names in the implant field and we have extreme confidence in our surgery. In fact, we warranty the implant so that if anything does happen and the implant needs to be removed and replaced, we do that at no cost.”

Dental implant cost can vary for each individual patient. Each person’s mouth is unique to them and, depending on their needs, wants and goals, the overall cost of the dental implants and the surgery may change. Lane Oral Surgery utilizes industry-leading dental implants which ensures that patients have healthy, long-term results. Some of the factors that may affect the cost of dental implants can include:
- Number of implants needed
- Bone grafting or gum disease treatments
- Location of tooth to be replaced
- Tooth extraction

As an oral surgeon, Dr. Lane has years of experience and education backing him, making his success rate over 95 percent. With every implant case, the practice also offers a dental implant warranty. This warranty covers the implant, at no cost to the patient, if a problem occurs and it needs to be extracted and replaced.

Dental implants are considered to be the gold standard of tooth replacement today. The dental implant cost may be more than temporary solutions, like dentures or bridges, but the results provide superior quality of life, health and aesthetic benefits. With proper care, patients can expect their full mouth dental implants to last them many years. The implant is so successful because it mimics the natural function of real teeth. The implant post is surgically placed into the jawbone to stimulate bone growth and firmly hold the implant in place. Then a dental crown or bridge will restore the implant, giving patients biting and chewing power, plus the ability to speak and smile with confidence.
