L-com Launch’s New Line of Passive Optical Fiber Taps for Monitoring and Testing of Fiber Optic Links

*L-com, a preferred manufacturer of wired and wireless connectivity products, announced today that it has just launched a new line of passive fiber optic taps to address telecommunications, test and measurement, R&D, fiber network maintenance and optical system design applications.*

IRVINE, Calif. (PRWEB) August 06, 2020 -- L-com, a preferred manufacturer of wired and wireless connectivity products, announced today that it has just launched a new line of passive fiber optic taps to address telecommunications, test and measurement, R&D, fiber network maintenance and optical system design applications.

L-com’s new passive fiber optic taps are used for monitoring and testing of fiber optic links. They split a certain percentage of optical power to allow for analysis of data and signal integrity, as well as enabling maintenance of a fiber link without interruption of service.

Since different split ratios are required depending on the data protocol, type of monitoring and type of testing, L-com offers split ratios of 50/50, 60/40, 70/30 and 98/2 off-the-shelf. Other features include single-mode and multimode versions, LC and MPO connector options, LGX module form factors as well as component form factors (single-mode LC only).

“We are excited to add to our already extensive fiber product line by offering these new passive optical taps. These products can be used in a multitude of test and analysis applications across a wide range of industries. By offering same-day shipping on these new products we are able to meet our customers’ urgent needs,” said Paul Hospodar, Product Line Manager.

L-com’s new passive fiber optic taps are all in-stock and available for same-day shipping.

About L-com:

L-com, a leading manufacturer of wired and wireless connectivity products, offers a wide range of solutions and unrivaled customer service for the electronics and data communications industries. The company’s product portfolio includes cable assemblies, connectors, adapters, antennas, enclosures, surge protectors and more. L-com is headquartered in North Andover, Mass., is ISO 9001: 2015 certified and many of its products are UL® recognized. L-com is an Infinite Electronics brand.

About Infinite Electronics:

Based in Irvine, Calif., Infinite Electronics offers a broad range of components, assemblies and wired/wireless connectivity solutions, serving the aerospace/defense, industrial, government, consumer electronics, instrumentation, medical and telecommunications markets. Infinite’s brands include Pasternack, Fairview Microwave, L-com, MilesTek, Aiconics, KP Performance Antennas, PolyPhaser, Transtector, RadioWaves, ShowMeCables, INC-Installs and Integra Optics. Infinite Electronics serves a global engineering customer base
with deep technical expertise and support, with one of the broadest inventories of products available for immediate shipment.
