Respected Dentist in Nashville, TN, Dr. James Pace Sr. Celebrates 40 Years Providing Life-Changing Dental Implants

Experienced dentist in Nashville, TN, Dr. James Pace Sr., celebrates 40 years of placing dental implants and helping patients with missing teeth permanently restore their health and confidence.

NASHVILLE, Tenn. (PRWEB) August 24, 2020 -- Dr. James Pace Sr., an esteemed dentist in Nashville, TN, has now been placing dental implants for 40 years. Since 1980, he has placed hundreds of implants in addition to providing personalized and minimally invasive general dentistry at Belle Meade Family Dentistry, where he practices with his associates Dr. Temp Sullivan and his own son Dr. James Pace Jr.

Dr. Pace has been in practice for over four decades, providing his community with state-of-the-art general dentistry and dental implant treatment. He received his Doctor of Dental Surgery degree from the University of Tennessee Health Science Center before opening his practice, Belle Meade Family Dentistry, in 1978. He later founded the Middle Tennessee Implant Study Club and remains active in many prestigious dental organizations, including the American Dental Association, Academy of General Dentistry, Nashville Dental Society, and American Academy of Implant Dentistry. Dr. Pace has made a name for himself in his community for the level of genuine patient care he provides and personalized treatments he offers the whole family. As a result, he won the Top Dentists in Nashville Award from 2015 to 2019.

With four decades of experience in dental implant treatment, Dr. Pace is pleased to have helped hundreds of his patients restore their health and quality of life after they have lost one, several, or all their teeth. Dental implants are comprised of a titanium post that is surgically inserted into the jawbone. This post naturally integrates with the bone to become as strong and stable as natural tooth roots. These posts can be restored with a dental crown or bridge, a denture, or a full set of permanent teeth. Implants restore the ability to eat a variety of foods, improve oral health, transform smile aesthetics, and boost self-confidence. Dr. Pace offers single and multiple dental implants, and implant supported bridges using sophisticated treatment planning and surgical technology.

At Belle Meade Family Dentistry, Dr. Pace and his associates, Dr. Sullivan and Dr. Pace Jr. offer comprehensive dental care in a welcoming and comfortable atmosphere. To provide the most minimally invasive and innovative services, the dentists remain current on the latest advancements in dental treatments and technologies. They are trained in the full range of general dentistry services, including Invisalign®, the Pinhole® Surgical Technique, dental implants, and laser dentistry.

Patients with missing teeth who want to learn more about the benefits of dental implants can contact the dentists in Nashville, TN. Appointments with Belle Meade Family Dentistry can be made by visiting www.bellemeadedental.com or calling 615-298-2030.
