Tandem Champions 2020 National Cybersecurity Awareness Month

Tandem is offering complimentary resources as part of a global effort to bring awareness to the need for cybersecurity resilience.

LUBBOCK, Texas (PRWEB) October 06, 2020 -- Tandem, developer of the leading information security and compliance management platform for financial institutions, announces its participation in National Cybersecurity Awareness Month 2020. By becoming a champion, Tandem joins the national campaign to help businesses stay safer and more secure online.

A multi-layered and far-reaching campaign held annually in October, NCSAM was created as a collaborative effort between government and industry to ensure all digital citizens have the resources needed to stay safer and more secure online while also protecting their personal information. As an official Champion, Tandem reinforces their commitment to cybersecurity, online safety, and privacy.

“We seek to help improve the security posture of our customers through easy-to-use tools, so it’s a natural fit for us to be involved with the National Cybersecurity Awareness Month campaign,” states Brady Cook, General Manager for Tandem.

As a part of National Cybersecurity Awareness Month, Tandem is making available several resources to help security-conscious companies be more proactive with their security programs.

1 – “Vendor SOC Report Review Template” – A checklist in printable PDF format. With this resource, companies have a straightforward method for reviewing third-party SOC reports (Systems and Organization Controls) efficiently and accurately. View the PDF.

3 – “Spear Phishing Training” – Complimentary phishing training video. Companies can share the training video with their employees as part of their security awareness program. In the video, two security experts show exactly how someone can take personal information available online and create a targeted phishing email that could do serious harm. View the video.

For more information about NCSAM 2020, the Champion program, and how to participate in a variety of activities, visit https://staysafeonline.org/cybersecurity-awareness-month/. You can also follow and use the official NCSAM hashtag #CyberAware on social media throughout the month.

About Tandem
Tandem is a web-based application designed to help with information security and compliance management. Companies that need to comply with information security regulations can easily manage regulatory compliance, improve information security, and lower overhead costs. Service providers are invited to partner with Tandem through the Tandem Partner Program. By partnering with Tandem, information security consultants can provide a more streamlined experience for their clients. Tandem is developed by Tandem, LLC, a CoNetrix company.

About CoNetrix
CoNetrix, LLC is a family of technology companies. CoNetrix Technology offers managed IT services as well as a suite of secure cloud computing offerings marketed as Aspire. CoNetrix Security provides information security consulting and testing to financial institutions. Tandem Security & Compliance Software® is online software helping organizations comply with information security requirements and regulations. AccountingWare® offers a suite of accounting software (ERP) modules to companies throughout the United States and Canada.
