FIBERTOWN to Consolidate Data Centers of New Health Care Client

Bryan, Texas-based data center closed a new agreement to provide long-term data center services for Kelsey-Seybold Clinic, a Houston-based, 350-physician multispecialty medical group. The Clinic will consolidate and move its current Houston data centers into a large section of FIBERTOWN.

Bryan, TX (PRWEB) March 3, 2010 -- FIBERTOWN, Houston’s premier tier-IV-designed data center and disaster recovery office space provider, closed a new agreement to provide long-term data center services for Kelsey-Seybold Clinic, a Houston-based, 350-physician multispecialty medical group. The Clinic will consolidate and move its current Houston data centers into a large section of FIBERTOWN’s Bryan-based data center.

“Kelsey-Seybold trusts us to manage client-facing applications and deliver high availability for its mission critical data because we guarantee 100% uptime and protection of its most important assets,” said Brandon Perryman, vice president of sales for FIBERTOWN.

For the past several years, Kelsey-Seybold has expanded patient care services in the Houston area and currently serves more than 400,000 patients in the region. The Clinic has made significant investments in information technology to improve patient care services and physician access to medical information.

“Our selection of the FIBERTOWN facility for our data center services provides a flexible way to meet our growing IT capacity needs in a highly secure and reliable data center environment,” said Philip Price, Ph.D, vice president of information technology for Kelsey-Seybold.

About FIBERTOWN:
FIBERTOWN is Houston’s premier tier-IV-designed data center and disaster recovery office space provider located 100 miles outside of Houston in Bryan, Texas. With true fault-tolerant A-B power, four megawatts of generator power, high availability N+1 cooling and a fully staffed, 24/7/365 network operations center, FIBERTOWN houses the mission critical infrastructure for Fortune 500 companies and smaller organizations across many industries. The SAS 70 certified data center and award-winning DR office space offers clients a carrier neutral, one-stop partner for best-in-class technology and amenities to support business continuity needs.
