Are You Toxic? Food and Medicine Are Destroying Your Health

We face a constant onslaught of untested synthetic chemicals marketed to us as 'new and improved' foods and medicines. These synthetics are aggressively promoted as safe and effective, but the truth is that manufacturers have no real idea what is safe!

Investigative journalist, Randall Fitzgerald, exposes the truth that each and every one of us, along with our children, our parents and our grandparents, are guinea pigs in a vast toxic experiment.

Cincinnati, OH (PRWEB) April 25, 2006 -- Are You Toxic?
Food and Medicine Are Destroying Your Health

Today, we face a constant onslaught of untested synthetic chemicals marketed to us as 'new and improved' foods and medicines. These synthetics are aggressively promoted as safe and effective, but the truth is that manufacturers have no real idea what is safe!

Investigative journalist, Randall Fitzgerald, exposes the truth that each and every one of us, along with our children, our parents and our grandparents, are guinea pigs in a vast toxic experiment.

He has launched a web site [www.hundredyearlie.com](http://www.hundredyearlie.com) and a free e-newsletter, The Fitzgerald Report to bring attention to this self-inflicted human crisis. His forthcoming book, The Hundred-Year Lie, Dutton June 2006, shows how we can protect ourselves from synthetic food and medicines that are destroying our health and endangering our lives. Natural, organic foods and medicine, alternative health care, natural therapies, as well as naturally occurring herbal and botanical remedies are the antidote to this vast toxic experiment that has converted our food, medicine and consumer goods from natural, wholesome and healthy to synthetic products that threaten our health.

The Fitzgerald Report contains the latest findings and developments that affect our health with a perspective not often presented by the mainstream media.

The FREE Fitzgerald Report features:
- 9 Myths You Cherish that are Destroying Your Life
- The Latest Whistleblower News
- Toxins Watch
- Special Alerts and Accumulating Scientific Evidence
- Natural and Organic Alternatives that will Help You Achieve Naturally Occurring Health

The Fitzgerald Report is a “Must-Read” for anyone concerned for their health and the health of those they love.

About Randall Fitzgerald
A former investigator reporter for legendary Washington, DC, investigative journalist Jack Anderson, and a Reader’s Digest contributing editor for 20 years, Fitzgerald wrote more than 100 articles on topics related to private property rights, the importance of personal accountability, and government corruption. Fitzgerald is a truth-seeker who pursued answers to questions he had about synthetic chemicals and health based on his own experience and that of members of his family, which led to his writing the explosive new book, The Hundred-
Year Lie.
