New Thermobalancing Therapy for BPH and Prostatitis Compares Favourably to Other Prostate Treatment Methods States Fine Treatment

New Thermobalancing Therapy is the most powerful tool for the treatment of BPH and chronic prostatitis when compared to all other natural and mainstream methods of prostate treatment, such as supplements, remedies, medications and manipulations, as it works continuously while Dr. Allen’s therapeutic device is applied, highlights Fine Treatment.

London, UK (PRWEB) June 07, 2012 -- A powerful prostate treatment tool, the new Thermobalancing Therapy is essential for the recovery from chronic prostatitis and benign prostatic hyperplasia (BPH) and compares favourably to all other natural and mainstream methods of treatment, such as supplements, remedies, medications and manipulations, which have limited efficacy and have to be used continuously for years at a high cost. The non-effectiveness of common prostate treatments is the reason for BPH and prostatitis patients turning to unsafe and even more expensive prostate removal procedures.

According to the National Institute of Health (NIH), as the prostate enlarges, the layer of tissue surrounding it stops it from expanding, causing the gland to press against the urethra like a clamp on a garden hose. The narrowing of the urethra and partial emptying of the bladder cause many of the problems associated with BPH. Patients with prostatitis experience considerable morbidity and may remain symptomatic for many years. Unfortunately, there is limited understanding of the pathophysiology and optimal treatment for most patients.

However, Dr. Allen has developed a therapeutic device which is a powerful tool for improving the condition of the prostate gland. Dr. Allen’s therapeutic device creates an ideal environment for capillaries, i.e. small blood vessels, to maintain the temperature inside the prostate that improves internal blood circulation reducing the swelling of the prostate gland. It helps to treat prostatitis and terminate the BPH progression. Consequently the pressure on the bladder decreases reducing the troubling symptoms. It is very easy to wear the device and it does not impede movement while walking, driving or doing some work. You can watch a video on how Dr. Allen’s device helps to reverse BPH: http://www.youtube.com/watch?v=dCFy_jZgCLw.

“New Thermobalancing Therapy has a steady positive impact on the prostate gland, unlike other natural and mainstream treatment methods of prostatitis and BPH,” says Dr. Allen. “Dr. Allen’s device has a proven efficacy for prostate enlargement and chronic prostatitis as it treats the prostate locally.”

Dr. Allen’s therapeutic device cleanses the prostate tissue naturally helping its users to get rid of lasting disorders without side effects. You can watch a short video about a user who has treated himself at home with Dr Allen's device on the Fine Treatment's website: http://www.finetreatment.co.uk/prostatetreatmentbph/prostatitistreatment.html.

About Dr. Simon Allen and Fine Treatment: Dr. Simon Allen is a highly experienced medical professional. His specialty is in the internal medicine and cardio-vascular field, and he has treated patients after a heart attack, with kidneys problems, including kidney stones disease, prostate and spine conditions. Fine Treatment exclusively offers Dr. Allen’s devices for chronic prostatitis and BPH treatment, coronary heart disease, dissolving kidney stones, as well as lower back pain and sciatica relief.
